Summary

Result-oriented Frontend Developer with expertise in **React.js, Next.js, and UmiJS**, specializing in **SEO optimization** and high-performance web applications. Proficient in building professional-grade user interfaces using **Ant Design and Tailwind CSS**. Experienced in seamless **API integration** and real-time state management. Currently expanding technical capabilities into **Backend development with NestJS and Node.js** to build scalable fullstack applications. Passionate about turning **Figma designs** into pixel-perfect code and delivering exceptional user experiences.

Education

University of South East Asia Bachelor
Information Technology Siem Reap • 2021-2024

Experience

Gaming Company Poipet
UI/UX Designer to Frontend Developer 2024-2026
UI/UX Designer Role:

- Created high-fidelity wireframes and interactive prototypes using **Figma** for gaming platforms.
- Established design systems and visual guidelines to ensure brand consistency across web and mobile interfaces.
- Conducted user research and usability testing to optimize user journeys and interface layouts.

Transitioned to Frontend Developer:

- Successfully bridged the gap between design and development by implementing UI components using **React.js** and **Tailwind CSS**.
- Developed responsive and high-performance web applications with **Next.js, UmiJS, and Ant Design**.
- Integrated **RESTful APIs** and handled state management to deliver dynamic user experiences.
- Implemented **SEO best practices** and performance optimization using Next.js SSR/SSG, significantly improving search engine visibility and user engagement.
- Collaborated effectively within a **multicultural, international team**, communicating in **English** to resolve technical issues and improve frontend architecture.

Casbiz Technology Siem Reap
C# internship 2023

- Developed a solid foundation in **C# programming** and Object-Oriented Programming (OOP) principles.
- Assisted in developing and maintaining software modules and desktop applications.
- Collaborated with senior developers to troubleshoot, debug, and optimize application performance.
- Gained hands-on experience with database management and system workflow design.
- Participated in daily stand-up meetings and followed the software development lifecycle (SDLC).
